10 EDIT

Even if you don't want to work in an office every day, you should consider starting your own business. That's right, you can be your own boss! If you have a hobby that you are very good at, you might be able to earn a living doing it. For example, if you **will** have a talent for web design, you could sell your services to small companies. To get started, choose a company that you know about and show them some examples of web pages you've designed. **Unless/If** they like your work, offer to design a web page for them for a small fee. If you **will** do a good job the first time, they will probably hire you again. They may also recommend you to other businesses. Soon you'll have a lot of customers contacting you, and you'll be running your own business. **Even if** you don't make a lot of money, you'll feel satisfied and successful. You will also be doing something you love. Running your own business can be a lot of work, but it's worth it. If people **will** enjoy their jobs, they are usually happier. You won't know for sure unless you **are going to** try.
